Professional Summary

B.Tech student specializing in Artificial Intelligence Machine Learning (CGPA: 9.26) with industry internship experience and hands-on exposure to AI, machine learning, and data engineering projects. Passionate about building intelligent, scalable software solutions, applying technology to solve real-world challenges, and continuously learning emerging technologies.

Technical Skills

Programming Languages: Java, Python, SQL

Computer Science Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN)

Machine Learning & AI: Machine Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision, Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering

Frameworks & Tools: FastAPI, Flask, PyTorch, TensorFlow, Keras, Scikit-learn, OpenCV, Pandas, NumPy, PySpark, LangChain, Git, GitHub

Data Engineering & Cloud: Apache NiFi, ETL Pipelines, HDFS, Docker, AWS (EC2, S3)

Experience

Data Engineering Intern at Yabx

June 2025 – July 2025

- Built and optimized ETL pipelines using Apache NiFi, processing large-scale financial datasets integrated with HDFS.
- Implemented secure data transfers with encryption across distributed systems using Big Data tooling.
- Automated production workflows and job monitoring using Linux CLI, reducing manual intervention.
- Developed an LLM-based financial advisor chatbot using LangChain and OpenRouter, enabling EMI calculation, loan guidance, and financial literacy assistance.

Projects

PneumoDetect – Chest X-ray Pneumonia Detection

GitHub

Python, PyTorch, OpenCV, CNNs, Explainable AI

- Designed and trained a **CNN-based medical image classification model** for pneumonia detection from chest X-rays.
- Built an **end-to-end machine learning pipeline** including data preprocessing, model training, validation, evaluation, and inference.
- Integrated **Explainable AI techniques** to improve model interpretability and support clinical decision-making.

Smart Financial Advisor – LLM-Based Conversational System

GitHub

Python, Streamlit, LangChain, RAG, LLMs, OpenAI API

- Developed a **Generative AI-powered conversational system** for personalized loan advice, EMI calculation, and financial education.
- Implemented **Retrieval-Augmented Generation (RAG)** to enable accurate, policy-aware responses from external knowledge sources.
- Deployed the application using **Streamlit** for real-time user interaction and rapid prototyping.

Education

University School Of Automation And Robotics , B.Tech in Artificial Intelligence and Machine Learning	2023-2027
CGPA: 9.26 Sachdeva Public School, Pitampura	Completed 2023
10th BOARD: 96.6% 12th BOARD(PCM): 94.2%	

Certifications

- OCI Generative AI Professional – Oracle Cloud Infrastructure
- Postman API Fundamentals Student Expert
- Kaggle Generative AI Certification
- Introducing Generative AI with AWS – Amazon Web Services
- AWS Educate: Machine Learning Foundations

Achievements

- Advanced to Pre Semi-Finals round of Smart India Hackathon 2025
- Ranked Top 15 in Xcelerate Ideathon 2025
- Ranked Top 20 in Sparktank Innovation Challenge Ideathon 2025
- Ranked Top 30 in Graph-e-Thon Hackathon 2025

Position Of Responsibility

Team Lead – AI Development (IoSC GGSIPU-EDC, Delhi)	2024 – 2026
- Led a team to design and deploy AI-driven applications, including chatbots, predictive models, and recommendation systems. - Architected end-to-end ML pipelines with Python, TensorFlow, PyTorch, LangChain, and LLMs for real-world solutions. - Managed projects using Agile methodologies, conducted code reviews, and ensured timely delivery of scalable AI solutions. - Collaborated with frontend and design teams to align AI features with user requirements and business goals
